

# Peyton D. Murray

Office 221, Physics Department, University of California, Davis, CA 95616 | pdmurray@ucdavis.edu

## Experience

---

Junior Researcher	2011 – 2012	Lawrence Berkeley National Lab
Teaching Assistant	2012 – 2015	U.C. Davis Physics Department
Graduate Student Researcher	2012 – Present	U.C. Davis Physics Department

## Education

---

Ph. D., Physics	Expected Fall 2018	University of California, Davis
B. Sc., Physics	May 2011	Saint Mary's College of California, Moraga, <i>summa cum laude</i>

## Honors and Awards

- 
- Summer Graduate Student Researcher Award, U.C. Davis, 2016 – 2017

## Research Interests

---

Magnetic properties of nanostructured films, wires, particles, and other patterned structures. Electrically and chemically driven ion migration, particularly as an approach for modifying magnetic and transport properties. Magnetic vortices and skyrmionic materials, including bulk systems, as well as multilayered and nanopatterned geometries. Application and theory of First Order Reversal Curves (FORC) method and the use of FORC in investigating switching behavior and interactions in hysteretic systems. Currently interested in micromagnetic simulations of skyrmions and nanostructures.

## Technical Skills

- 
- **Characterization:** Vibrating sample magnetometry (VSM), magneto-optic Kerr effect (MOKE) magnetometry, with particular experience in applications of the First Order Reversal Curves (FORC) method in understanding magnetic interactions and hysteretic behavior. Structural characterization including X-ray diffraction (XRD), reflectivity (XRR), and reciprocal space mapping (RSM). Electrical transport, including Van der Pauw and Hall effect techniques. Imaging using scanning electron microscopy (SEM) and energy dispersive X-ray spectroscopy (EDS).
  - **Fabrication:** DC/RF magnetron sputtering, e-beam evaporation, nanofabrication by photolithography and lift-off.
  - **Programming:** 10 years of Python and 8 years of C++ experience writing data reduction, visualization, analysis, and instrument control software. Proficient with Go, CUDA, Mathematica, Matlab, LabView, and LaTeX, as well as revision control software (Git and SVN). Web development experience with Jekyll, HTML, and Markdown.
  - **Other:** Familiar with maintenance and repair of VSM, XRD, SEM, MOKE, and high vacuum equipment. Experience with cryogenics, high-temperature furnaces, and standard laboratory chemicals.

## Presentations

---

- “Topological Hall Effect in Planar Artificial Skyrmion Lattices”, P. D. Murray, Z. Chen, D. A. Gilbert, J. Zang, T. Stücker, K. Lenz, B. B. Maranville, J. Fassbender, H. Yu, J. Borchers, K. Liu, poster presentation. Conference on Magnetism and Magnetic Materials, Pittsburgh, PA, 9 November 2017.
- “Complete Suppression of Magnetism in  $\text{Gd}/(\text{La},\text{Sr})\text{CoO}_3$  Films via Redox Design of Oxygen Distributions”, P. D. Murray, D. A. Gilbert, A. J. Grutter, A. L. Ionin, R. V. Chopdekar, A. T. N’Diaye, B. J. Kirby, B. B. Maranville, Y. Takamura, E. Arenholz, K. Liu, and J. Borchers. Conference on Magnetism and Magnetic Materials, New Orleans, LA, 2 October 2016.
- “Complete Suppression of Magnetism in  $\text{Gd}/(\text{La},\text{Sr})\text{CoO}_3$  Films via Redox Design of Oxygen Distributions”, P. D. Murray, D. A. Gilbert, A. J. Grutter, A. L. Ionin, R. V. Chopdekar, A. T. N’Diaye, B. J. Kirby, B. B. Maranville, Y. Takamura, E. Arenholz, K. Liu, and J. Borchers. APS meeting of the Far West Section, 29 October 2016.
- “Interfacial Coupling of Ferroelectric Domain Walls and CoFe Investigated via First Order Reversal Curves”, Q. Zhang, P. D. Murray, L. You, C. Wan, X. Zhang, W. Li, U. Khan, J. Wang, K. Liu, and X. Han, poster presentation. IEEE Magnetism Summer School, Tohoku University, Sendai, Japan, 11 July 2016.
